

Assembly Systems

NEFF is producing C-Frame- and double-sided H-Frame assembly presses, which could be driven in the **manual or automatic mode** depending on the requirements.

Moreover these **stand-alone solutions** could be also integrated in **fully automatic assembly lines**.

Depending on your needs NEFF will produce a turnkey line according your requirements.

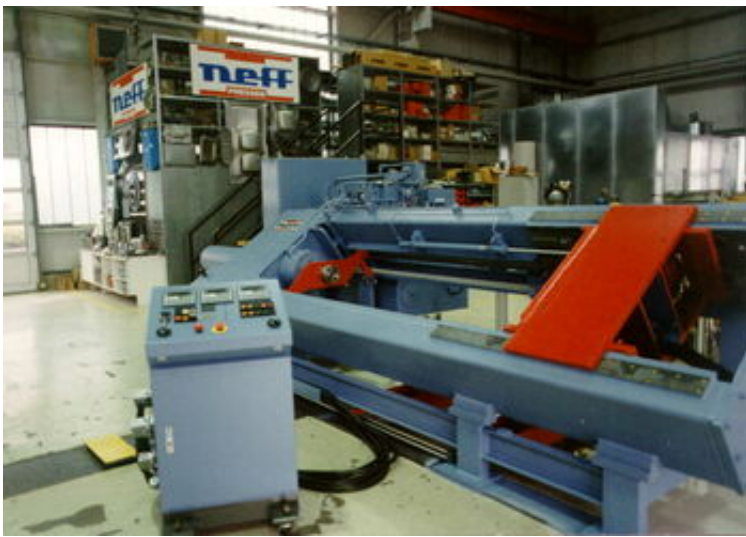

Please do not hesitate [to contact us](#) for an individual solution.

For assembly processes you can choose the NEFF- type series T (assembly press), S (C-Frame press) and DP (double sided press)

NEFF assembly presses T 10 with assembly force control in series production

NEFF horizontal press for joining of rotors and motor shafts

NEFF Assembly press DP with automatic moving table
